## AB 705 Math Validation

## Who is included in the data?

- Students with an educational goal of transfer to a four-year institution, earning a certificate, or earning a degree, who enrolled in their first math class in Fall 2019, Spring 2020, Summer 2020, and Fall 2020, tracked for one academic year.

BSTEM Pathway (MATH 040, MATH 130, MATH 141, MATH 142, MATH 150A, MATH 150B, MATH 250A, MATH 250B)

## A closer look at students who began the math sequence below transfer-level (Math 40/41/44)

- A total of 943 students started the math sequence below transfer-level.
- 236 received a placement into below transfer-level math (161 into Math 40, 54 into Math 41, and 21 into Math 44)
- 576 received a placement into transfer-level math but chose to enroll below transfer-level (304 into a standalone transfer-level math, and 272 into a paired transfer-level class)
- 131 did not have a valid Cypress College math placement on record (some had FC placement, some had placements that pre-dated multiple measures using the MDTP, and some simply did not have a math placement at all)
- Most students who began the math sequence below transfer-level had majors within the Health Sciences (426) and Business/CIS (174) divisions.

## More info on AB 705 college-level math compliance

AB 705 states, "The bill would also authorize the board of governors to establish regulations that ensure that, for students who seek a goal other than transfer, and who are in certificate or degree programs with specific requirements that are not met with transfer-level coursework, a community college maximizes the probability that a student will enter and complete the required college-level coursework in [English and] mathematics within a one-year timeframe."

- Of the 943 students who began their math sequence below transfer-level, 629 had an educational goal that included transfer, and 314 had an educational goal that did not include transfer.

The educational goals are as follows:

- 548 associate degree and transfer to a four-year institution
- 81 transfer to a four-year institution without an associate degree
- 246 obtain a 2-year associate degree without transfer
- 68 obtain a certificate without transfer

A snip from the AB 705 FAQ document:
It is important to distinguish, however, between programs that have a quantitative reasoning requirement that is at the college-level (e.g., the degree or certificate only requires intermediate algebra, geometry, or similar for completion) that can be reasonably satisfied by a course that is a transfer-level mathematics course (e.g., statistics, college algebra, etc.). AB705 requires that students in such programs should also be provided access to transfer-level courses in mathematics (with support if necessary) and that their probability of completing the course at the transfer-level should be also be maximized. Programs with local degree requirements that are at the and that cannot be satisfied by a transfer-level courses should be reported on the college-level tab.
